Practical Title: Semantic HTML5 Pages with Accessibility-Ready Structure

Develop static HTML5 skeletons for at least 10 StudentHub pages such as Home, About, Register, Login, Dashboard, Events, Profile, Contact, Admin, FAQ, and Feedback. Use semantic tags and accessibility-friendly structure.

A. Theory

1. Are semantic tags such as header, nav, main, section, article, aside, and footer used properly?

Answer: Yes, semantic tags like header, nav, main, section, article, aside, and footer are used properly when they match the actual meaning and structure of the content. They help search engines and screen readers understand web pages, replacing old generic tags like div.

<https://csegyan.com/HTML/html-semantic-elements.php>

2. Are form labels, headings, image alt text, and navigation links accessible?

Answer : Yes, these elements are accessible when built correctly. Form labels need clear associations with inputs. Headings must follow a logical order. Image alt text should describe the visual content or mark it decorative. Navigation links need distinct, descriptive text for all users.

3. Is the page structure consistent across all pages?

Answer: Yes — same header, nav, and footer structure is repeated identically across all 10 pages for uniformity.

B. Implementation/ Output/Result

Created 10+ static HTML5 pages for the StudentHub portal: index.html (Home), about.html, register.html, login.html, dashboard.html, events.html, profile.html, contact.html, admin.html, faq.html, and feedback.html.

C. Evidence of Work (Screenshots)

The image shows two screenshots of a web application called 'StudentHub Portal'. The top screenshot is the 'Student Registration' page, and the bottom screenshot is the 'Student Login' page. Both pages are displayed in a web browser window with a Windows taskbar at the bottom.

Student Registration Page:

- Page Title: StudentHub Portal
- Navigation Links: [Home](#), [About](#), [Register](#), [Login](#), [Dashboard](#), [Events](#), [Profile](#), [Contact](#), [FAQ](#), [Feedback](#)
- Section Title: Student Registration
- Form Fields:
 - Full Name:
 - Email Address:
 - Mobile Number:
 - Course:
 - Year:
 - Gender: ☐ Male ☐ Female ☐ Other
 - Password:
 - Confirm Password:
 - ☐ I agree to the Terms & Conditions
- Buttons:
- Footer: © 2026 StudentHub Portal | Web Development Frameworks

Student Login Page:

- Page Title: StudentHub Portal
- Navigation Links: [Home](#), [About](#), [Register](#), [Login](#), [Dashboard](#), [Events](#), [Profile](#), [Contact](#), [FAQ](#), [Feedback](#)
- Section Title: Student Login
- Form Fields:
 - Email Address:
 - Password:
 - ☐ Remember Me
- Buttons:
- Text: Don't have an account? [Register Here](#)
- Footer: © 2026 StudentHub Portal | All Rights Reserved

The image displays two screenshots of a web browser showing the StudentHub Portal. The top screenshot shows the 'Student Profile' page, and the bottom screenshot shows the 'Contact Us' page.

Frequently Asked Questions

How do I register?
Open the Register page and fill in your details.

How do I login?
Use your registered email and password.

Can I update my profile?
Yes, after logging in you can update your profile.

E. Challenges Faced:

Maintaining consistency across 10+ pages — Manually copying the header/nav/footer into each new HTML file led to small inconsistencies (typos, mismatched class names). Solved by creating one "master template" file and copying from it for every new page.

F. Learning Outcomes:

Analyze and interpret how semantic structure improves both usability and search engine/accessibility compliance.

Faculty Remarks:
